TECHNICAL SKILLS

Football Analytics & Tracking Data

Pitch control, xG, passing networks, pressing & off-ball movement, StatsBomb, mplsoccer, TRACAB 3D tracking data

Computer Vision (Sports)

YOLOv11, ByteTrack, TVCalib camera calibration, player detection, multi-object tracking, pitch registration from video

Machine Learning & Data Science

Python (pandas, NumPy, scikit-learn, PyTorch), SQL, R, Jupyter

Cloud & Deployment

AWS (S3, Sagemaker, Bedrock, EC2), Docker, Google Cloud, Streamlit

BI & Data Visualization

Power BI, Tableau, Looker, Salesforce MCI

FEATURED PROJECT

AWS World Sports Innovation Cup 2026

Finalist @ DFB Campus, Frankfurt

- Built the "Football Body Intelligence Platform", deriving two proprietary metrics from TRACAB TF15 3D skeleton tracking: scanning/awareness index and pressing quality index
- End-to-end production pipeline on AWS: S3, SageMaker (10 parallel training jobs), Bedrock (Nova Lite), Docker, Streamlit dashboard.

CERTIFICATES

Datacamp:

Professional Certificate Data Analyst

Professional Certificate Data Scientist

Codcademy:

Professional Certificate Data Scientist (Data Analytics, ML & BI)

International Football Institute (IFI)

Football Analytics: Data Analysis in Football (virtual 4-week program)

Moritz Philipp HAAF

FOOTBALL DATA SCIENTIST

ABOUT ME

Football data scientist building reproducible pipelines and coach-ready tools from event, broadcast, and 3D tracking data. I model pitch control and off-ball movement from broadcast video (YOLOv11, ByteTrack, TVCalib) and deliver scouting, opponent, and physical-performance insights with Python and SQL (DuckDB), production ML on AWS (SageMaker, Bedrock), and dashboards in Streamlit and Power BI/Tableau.

WORK EXPERIENCE

01/2025 - current

PUBLICIS MEDIA AUSTRIA / PUBLICIS GROUPE

Senior Digital Data & Dashboard Manager

- Design cross-source data models and reusable pipeline components for international stakeholders, harmonizing taxonomies and automating refreshes.
- Build Python utilities for ETL, QA, and API integration; implement calculated metrics and dimensions in Salesforce Marketing Intelligence (Datorama).
- Coordinate between local and international network teams, aligning data standards and reporting logic
- Contribute to agency-wide data & AI strategy and product development, strengthening analytics maturity and reuse
- Act as internal consultant for data visualization, automation, and dashboard best practices across teams

04/2024 - current

FREELANCE / itzmore.dev

Football Data Scientist

- Develop a broadcast-video tracking and pitch-control pipeline (YOLOv11, ByteTrack, TVCalib, Shaw TTI model)
- Build end-to-end football-analytics prototypes on open data (StatsBomb, FBref): ingestion and cleaning in Python and SQL (DuckDB), delivered via Streamlit and Power BI/Tableau
- Train and evaluate an xG model and derive passing networks, shot maps, and possession-adjusted player metrics, documented across a portfolio of open-source repos (github.com/itzmore-mph)
- Deliver commercial analytics and BI work for non-football clients: Tableau training, SQL data modeling in Peliqan, and dashboard development

08/2022 - 04/2024

RED BULL MEDIA BRAND NETWORK / RED BULL MEDIA HOUSE

Digital Competence Specialist

- Analyzed digital user data across YouTube and Red Bull owned platforms to support content and product decisions
- Implemented new formats and technical solutions in collaboration with internal engineering and product teams
- Managed and optimized display & video campaigns in Google Ad Manager

10/2021 - 09/2022

SPORTRADAR AG

Manager Digital Advertising

- Developed audience segmentation models using data analysis and machine learning.
- Designed and executed A/B tests and performance analyses for digital products.

06/2021 -08/2022

HAWK-EYE INNOVATIONS LTD

Football Systems Operator

- Set up and operated VAR/replay systems for Austrian Bundesliga & UEFA fixtures on a freelance basis
- IFAB approved Replay Operator for professional football matches, supporting live decision-making & officiating
- Application of project management skills to optimize sports technology processes

02/2019 - 09/2022

E2 COMMUNICATIONS GMBH

Oddsserve & Ad Operations Manager

- Managed campaign data operations across Adition, Epom, and Adform, using analytics to optimize delivery
- Built data-driven reporting mechanisms and integrated web analytics and conversion tracking for client sites

08/2016

TORALARM GMBH

Internship

- Supported user growth analysis and product development for one of Germany's leading football livescore apps.
- Contributed to integrate Amazon Alexa skills, enhancing product usability and expanding market reach

Education

Master - MSc AI Applied to Sports

Sports Data Campus / UCAM

(2025 - 2026; thesis in progress)

ML/DL, Computer Vision, NLP and LLMs, GenAI, Data Engineering/MLOps, opposition intelligence (multi-agent RAG). Final Master's Project: "Pitch Control from Broadcast Video", player-tracking pipeline (YOLOv11 + ByteTrack), camera calibration (TVCalib), Shaw TTI pitch-control model; validated on SoccerNet GSR 2024

Master - MA in Business

FH St. Pölten (2019-2021)

Digital Media Management

Master Thesis: "GDPR Compliance of alternative Webtracking Methods"

(Overall Grade: 1.9 - Passed with Merit)

Minors: Innovation & Business Dev. + Content & Programme Mgmt

Bachelor - BSc (WU)

WU Wien (2014-2018) - BWL

Bachelor Thesis: "Integration of Migrants through Team Sports"

(Overall Grade: 2.3; Exchange Semester: Birmingham UK (Aston University))

Minors: Service & Digital Marketing + Accounting & Taxation
